

Stay Connected with Virtual Events

Whether it's due to global travel restrictions or personal circumstances, the unexpected need to take your meeting digital in a matter of hours has become a reality. Having a specialized team that enables you to keep meeting objectives on track is critical to the success of your event.

Types of Virtual Event Solutions:

Webcasting

Video feed of an event broadcasted over the internet. It allows you to have multiple content windows that may include a presentation slide window as well as a live event feed window streaming a presenter.

Webinars

Host and distribute live content internally or externally through a webinar platform. Webinars are often used for educational and learning content and include polling and digital Q&A.

Video Conferencing

Have multiple remote participants that come together in a virtual environment to collaborate for meetings or group discussions.

Custom Streaming

This includes social streaming - whereby your event can be live streamed and managed on Facebook or YouTube. Custom streaming also offers embedded video directly on your company website.

Custom Broadcast Studios:

Captivating newsroom-style studio rooms with multiple set designs and multi-angle camera broadcasting capabilities. Available across Canada.

Private Video Conferencing Spaces:

Spaces with built-in Video Conferencing units to execute your video conference seamlessly. Available in Vancouver, Edmonton, Calgary, Toronto, Ottawa, Montreal and Halifax.
